

Rock-a-bod lady

As sun set last night on the Rocking Chair Marathon, Freshman Diane Ingersoll remains as the only candidate not yet off her rocker.

Somewhere between Wednesday and yesterday, Diane's four competitors all hit the skids. Last year's champion, Kathy Jenkins and arch-rival Gary Lasater both incurred illnesses, while Eileen Smith and DeLon Explin quietly withdrew after fulfilling the time limits they had set for themselves.

The event comes as part of a somewhat unnoticed marathon that began ten minutes late Wednesday because the majority of entrants failed to show up on time. With a handful of onlookers cheering the start, the quintet of rockers rode on into the night but soon after sunrise the next day, slowly dropped out of sight one by one.

Diane stated she wasn't sure if she could make the distance but as of yesterday afternoon she did not feel tired. "I wouldn't do this next year," she said. "I may be dumb but I'm not stupid."

More pass-fail planned— General education only

By KALEVI SARKALAHITI

Universe Staff Writer

Plans for more pass-fail classes but restrict them to general education according to school officials.

Bert W. Spencer, dean of the Divisions and Records, said Thursday pass-fail classes are expected in the Bible religion, physical education or any of the general education

ever, students have found that this hurts them especially when they go to the graduate school, he said. "BYU will keep the old letter system in the major area classes.

Interest is to make sure that our students don't get hurt by our decisions," he said. "We listen to them and try to do what's best for them."

When the system was adopted many years ago, it was thought that students would be easier to pass-fail, Spencer said.

It was proven not to be the case. Students also believed that under the system when the students would

compete only against themselves they would become more self-motivated.

This appeared not to be true. According to Spencer, the good students studied less and the bad ones stayed the same. The pass-fail system created mediocrity.

The pass-fail concept, also known as a less competitive form of grading, was not institutionalized until recently when it was adopted at such schools as Cornell, Ohio State, and the Univ. of Minnesota.

The current trend toward the system undoubtedly received the initial stimulus when, after the 1964 riot, the academic senate of the Univ. of California at Berkeley recommended adoption of pass-fail grading.

By the spring of 1971 at least two-thirds of all four-year colleges and universities had adopted some form of pass-fail grading.

However, even before colleges began to offer the noncompetitive pass-fail option, many students and faculty members expressed the fear that graduate schools might not smile upon so permissive a system.

Now with the pass-fail method well into its fourth year at a number of institutions, that misgiving appears to have been at least partly borne out.

ly Jar empties

Students are eating it up

By JEFF HOUSE

Universe Staff Writer

A half ton of cinnamon bears hit the Wilkinson Center main desk yesterday and it's only a matter of time before students eat 'em up.

"They'll be one of 73 items dumped into the jars of The Candy Jar, a new attraction with a different problem.

"They can't keep the jars filled. "We didn't buy enough candy to stock the place, I can't believe it," said Jay Eitner, Business Manager for the Wilkinson Center.

When the shop first began he purchased 60 pounds of cinnamon bears, believing they would last the first two weeks. But they sold out in the first day and a half, and the manager has now ordered an additional half ton of the cinnamon bears alone.

The reason for The Candy Jar's success

lies in three areas, according to Eitner. He feels the unique design of the structure appeals to students. He also said direct ordering from candy factories meaning "very reasonable prices," is a student drawing factor.

Also, the inclusion of some confectionary specialties as chocolate mint strips, pineapple slices and peanut pokies along with the more unusual items offer a variety that Eitner said covers all student tastes.

The horizon seems limitless. Eitner said he may try natural food items, diabetic confectionaries or even some fruit candies. He said that The Candy Jar will vary its selections of ten.

As the man responsible for The Candy Jar's initiation and constitution, Eitner himself doesn't like candy. But putting his own personal taste aside, he began plans for The Candy Jar a year ago feeling BYU students would eat it up.

The empty jars seem to bear him out.

Committee to launch pouch idea

IDs in new frame-up

By JOHN TAROCHIONE

Universe Staff Writer

The ID card committee has a new bag for student identity.

Plastic pouches with embossed numbers will be available March 21 to encase the old student ID cards for easier use, the committee reported Thursday. Roger Goodrich, committee chairman, indicated that possible uses were only in the planning stages.

These new cards will be "zapped" by

data recorders located around campus, according to the committee. With their cards, students will be able to check out books and PE equipment "much faster," authorities noted.

Goodrich also discussed plans for a new "sticky-back" activity card. He said that the card will be attached to the back of the ID, making ID and activity card one piece. "Sticky" activity cards will be available by fall semester '73, or possibly by summer term, Goodrich said.

The committee reported that an absorbent felt tip pen will be used to mark the activity card, instead of the punch system now used in athletic event lines, at voting booths, etc.

Losing the new card will be more expensive, George Hampton of the BYU photo studio pointed out. He reminded the committee that it will mean replacing photo and activity card, instead of the present \$2 fee for ID or \$4 for activity card.

All students taking summer or fall classes are asked by the committee to pick up the new pouch now. They said the pouch is free-at this time—but there might be a fee at registration.

Jeff Boswell, ASBYU executive vice-president, said that distribution will take place in the ELWC Orange Lounge (adjacent to the East Ballroom), following this schedule starting Wednesday March 21st:

Wednesday, Aa - Bb; Thursday, Bp - Da; Friday, Db - Gg; March 26th, Gp - Ja; 27, Jb - Lb; 28, Lp - Oc; 29, Od - Ro, 30, Rp - Ts; April 2, Tb - Zz; 3, all latecomers.

The committee expressed some concern that students would throw the new ID away once the activity card expired. Students might not realize that the new ID card must be removed from the activity card first.

Ann Chessman: pouring it on.

'Dressed' up male student tests norms

By CECELIA HARRIS
Universe Staff Writer

If you thought you saw a young man wandering around campus in a green dress Thursday afternoon, your eyes were not deceiving you.

When asked to explain what he was doing, Steve Jones replied, "I'm just walking around campus in a dress."

Jones, an enterprising freshman CDFR major from Los Angeles conducted "an experiment in social norm deviation" for his CDFR 210 class by changing his dress norms.

"A lot of students box themselves in social norms they think society expects of them," said Gary Clifton, a graduate student in CDFR who is the class instructor. He assigned each student to do something he would not normally do.

"I wanted to give each student the opportunity to do something different," he explained. "I've given them permission to deviate, but not to get into trouble."

And each student has completed the assignment in his own way. "After I gave the assignment, one student walked into class late and came up and kicked me!" said Clifton. "I gave her the freedom to express how she felt."

During his stroll around

Photo by B. Petersson

Freshman Steve Jones and friends.

campus, Jones experienced laughter, contempt, interrogation and even open hostility.

"Most of the guys were really upset, almost to the point of being rude," said Jones. "But the girls thought it was funny." He received repeated whistles, requests for dates, and a couple of girls approached him about being the third roommate they needed for next year.

BYU student insurance policy conditions explained

By BRIAN MANWARING
Universe Staff Writer

Students covered by BYU student insurance are losing time and money because they are not acquainted with the conditions of their policies.

According to George W. Sorenson, district sales manager for Aetna Life Insurance Company, which underwrites and administers student insurance, one of the most common mistakes students make is that they do not go to the Health Center first.

"Many times students will just go to a local doctor or hospital with an injury or sickness, thinking that the student policy covers them," said Sorenson. "In actuality, however, the student policy only covers such outside expenses if the student has been referred to the local doctor, or hospital by the Health Center."

In other words, the student

must go to the Health Center first for treatment of any illness or injury. If the Health Center facilities are not adequate for proper treatment, then the students will be referred to a doctor or hospital. When the student is referred, student insurance will help cover outside costs as well as Health Center fees.

"The only exception to this rule would be in the case of a student injured in a serious accident and it was necessary to rush him directly to a hospital," explained Sorenson. "Also, if the student purchases coverage for the entire year, and is absent during the summer, he may go to the nearest medical facility for treatment."

Under the provisions of the present policy, students are required to pay for all prescriptions and 20 per cent of Health Center fees.

ASBYU voting continues today

Before 5 p.m. Thursday, 4,484 students had cast their ballots in the second day of ASBYU final elections. An hour of voting time remained before the 6 p.m. closing hour. Voting will continue today.

Voting machines are located by the Reception Desk, ELWC, and polls remain open from 9 a.m. to 6 p.m.

Voting booth monitors reported that turnout for the elections yesterday was "less than normal" and that a higher turnout had been expected.

One monitor indicated that the recent controversy concerning a possible misplaced 500 votes due to student confusion about operation of the voting machines may have had an effect.

Once to avoid draft

Students enter now for benefits

By WENDY DUTCHER
Universe Staff Writer

Prior to the end of the Vietnam War, many people took the Air Force Officer Qualifying test to avoid the draft. Now it appears the majority take it because they are interested in the AFROTC program and its benefits.

Win Jordan, sophomore from Oak Ridge, Tenn., said he first became interested in the Air Force because of his desire to serve his country. He took the test recently because it was required for his scholarship application and considers it one of the finest scholarships the university has to offer.

"An AFROTC scholarship pays for tuition, fees, books, plus \$100 a month tax free," he said.

JAMES GASIK from Shasta Lake, Calif., said, "I took the test because I have always wanted to fly."

Gasik expects to be commissioned as a second lieutenant and enter flight training school for a year after he graduates from BYU.

Lance Hammond, sophomore from Quincy, Washington, said he took the exam because he was applying for a scholarship and because it was required for entrance into the professional officer corps.

The test consists of five parts and takes approximately seven hours to complete. There is a general section which measures

verbal ability, mechanical skill, math aptitude, and the individual's suitability as a prospective Air Force officer. The fifth part is designed specifically for those students who are interested in becoming pilots or navigators.

WHEN TAKING THE test, a student applies for one of the three positions which interest him. He may apply for a non-flying status, or he may apply for a position as a pilot or navigator. In the latter case, he must have a minimum combination score of 50 on the navigator and pilot section of the test, Captain James Hidden of the BYU detachment said.

According to Capt. Hidden,

First in program

H. Verlan Anderson of the Accounting Dept. will be the speaker at the first BYU Second Stake Young Adults Fireside to be at 8 p.m. in 396 ELWC Sunday, according to a stake representative.

Anderson is the author of "Many are Called and Few Are Chosen" and "The Great and Abominable Church of the Devil."

He is presently serving in the Utah Legislature and has law degrees from both Harvard and Stanford Law Schools. He has practiced as an attorney and as an accountant, being a Certified Public Accountant.

"Most students don't really need to worry as we usually have 85 to 95 per cent pass."

The test is a national exam, usually given twice a month. The tests are collected and sent to Maxwell Air Force base in Alabama, where the results are determined by computer. There is no competition with others because all tests are graded against the same standard, he added.

The majority of students who take the test are sophomores. Capt. Hidden explained, "the sophomore year is the best time to qualify for acceptance into the professional officer core, which encompasses the junior and senior years, and it is also a good time to apply for scholarships."

CAPT. HIDDEN said, "presently one-fourth of the 400 AFROTC cadets are on full scholarships."

All cadets who graduate from BYU's professional officer core program are commissioned as second lieutenants and are obligated to serve four to five years active duty, depending on whether or not they train to become pilots, he added.

According to a spokesman of the detachment, no special requirements are necessary to take the AFROTC. You don't have to be a member of the AFROTC to take it, nor do you have to join if you pass, he said.

annual symposium

Engineers discuss problems

ers from all areas of the eng field participated in annual Engineering symposium conducted Thursday. ranged from video discs to air pollution the day-long convocation, which many of the chief ing problems of Utah ewed.

ster, chief of systems g for the Utah State ent of Highways, and Will director of Transportation Wasatch Front Council, some of the solutions posed to reduce traffic in urban areas. Both at mass transit systems e used to alleviate highways, using the problem of air

ulty award

Dr. Nelson

BUREAU - The annual Faculty Award of the College of Business was ted this year to Dr. Glen n, director of the Center onomic Education and chairman of the BYU es Department.

nnouncement was made y Dr. Weldon J. Taylor, the College of Business, present the award at the 's annual banquet y, March 21, at 7:30 the Wilkinson Center

Dr. Nelson will give a hess at the event. ard was established to ch year's faculty member distinguished himself by ng recent contributions osition while at BYU in eal service, publications, ng, research and ation.

pollution, Dr. Garry Reed Marchant of the Kennecott Copper Corporation, stressed that a clean environment will be possible only when each individual does his share.

He said that people will have to do without certain luxuries and perhaps pay more for certain products if they want pure air. One such product is the automobile. The 1976 price for automobiles will be up \$300-500 with new exhaust equipment for air quality control.

Dr. Val A. Finlayson of the Utah Power and Light Company, pointed out in his address that talk about an energy crisis is no hoax. He said Utah is in a good position with large supplies of quality coal, but the state will have to look ahead to future needs. Among possible solutions, Finlayson listed geothermal, nuclear and solar power.

THE PROBLEM of water development and engineering was discussed by Daniel F. Lawrence, director of the Utah State Division of Water Resources. He told engineers that the need for sanitary water engineering will increase in "geometric proportions" in the future, as well as the need for conservation projects such as the Dixie Project.

Lawrence suggested scientific weather modification and re-use of water from urban sources as methods for "stretching our existing water supplies to meet our needs."

Darrel Monson, director of instructional services, outlined the present and future of engineering as applied within the communications field. Cable TV, individual video tape cassettes, video discs, and wall projected three-dimensional TV offer a few of the interesting engineering

possibilities for the future, said Monson.

He pointed out that some communications networks within businesses and government agencies are becoming so large that conventional communications methods simply aren't sufficient to carry the load

COMMUNICATIONS SATELLITES, two-way radio and micro-wave relay are some of the methods now being applied to handle the growing demand for adequate communication.

The social problems that engineers face were discussed by Bruce Bishop, former Federal Highway engineer and current USU professor. Bishop said the engineer of today must be concerned about the social consequences of engineering projects. He pointed to the National Environment Policy Act of 1970 as an indicator of the concern being shown about the social impact of engineering projects.

He also discussed the possible legal actions that are sometimes taken against engineers for inadequate planning.

Drafting the budget

The cost of \$84 million to operate the Selective Service System doesn't seem like much when compared to the entire federal budget of \$269 billion this fiscal year.

It could, however, mean a lot in terms of dollars and cents for worthwhile programs that are short on federal funding because of President Nixon's efforts to trim the budget.

Even with money-saving efforts, the budget is up \$18.1 billion over last year, \$2.6 billion of this increase going to extend the defense budget to \$78.3 billion. The increase in defense spending is largely due to pay hikes and augmented retirement benefits for servicemen. This is the extra it is costing to go from a conscripted army used in wartime to an all volunteer peacetime force.

Though exerted efforts are being made to recruit volunteers, recently two million American men born in 1954 were assigned lottery numbers for a possible draft. Those with numbers under 95 still must have physicals and will receive classifications. Eighteen-year-olds are required to register with their local draft boards to await their turns in the lottery next year.

None of these youth are expected to be called up, but though there is no draft, the Selective Service System remains intact "in case of future emergency." The cost of this department might be one the government could get rid of.

The military's aim is to keep the volunteer army the size of the old one that was supported by the draft. With a standing army the size of the force that existed while Americans fought in Vietnam, it could certainly handle a national emergency if one came.

"IT'S GOOD TO KNOW OUR RESERVES ARE IN FIGHTING SHAPE."

John Balmforth

Digging at the 'underground'

Nobody knows how many there really are. Some say 5,000. Some say as many as 80,000. They drift from coast to coast, usually ending up in college towns.

They carry no licenses, have no bank accounts, do not rent rooms, have no credit cards and above all, keep out of trouble. One other trait they have in common is they are all wanted by the law. It's called the "underground."

As one member of the underground put it, "All it is, is friends. We party together."

Alan J. Mayer, of the Wall Street Journal explained it this

way: "It's a generation—or at least part of a generation—scattered across the country, people sharing the same basic attitudes."

Most agree the movement, if it is a movement at all, sprang up because of the widespread feeling of frustration built up during the Vietnam years. Most of the underground members went underground because of anti-war activity. Some are fugitives for very serious crimes, others for minor offenses.

Out of necessity these people must avoid trouble, for trouble almost certainly means an arrest.

Since the law simply does not have the means to hunt them down, about the only time an arrest is made is when an underground member gets into trouble. Perhaps in a round-about way, some good can come from this.

Since most of the underground will want to avoid arrest, chances are good they will live more within the law. Some will probably become aloof, but nevertheless law-abiding citizens. The ones that do not settle down will get caught. It will just be a matter of time for them.

HAPPY

Editor:

I saw "Stone Tables" last night. I won't be the same for a long, long time. To anyone who has doubted himself, his worth, his purpose, or his God: the time is now. The spirit of love is in that show; of love, of peace, and of the Lord.

"I'll sing to the Lord. The Lord is my king. I thank him for what I learned there. About obedience. About people. And about myself. I saw 'Stone Tables' last night and I shall not be the same again."

Miriam R. Bean
Bellevue, Washington

RIP-UP COMPLAINT

Editor:

Before I came here, I thought the BYU was the Cuban Kingdom on earth. Now that I've been here a year, I am convinced that this place is almost as bad as any place else.

This is evidenced by a last advertising book. I lost it in the Fine Arts Center about two weeks ago. I satively thought that some kind word would turn it in to Lost & Found.

I've been in the house and it hasn't yet to show up.

I am actually writing this to the person who ripped it off. When back

A fine American lady died last week.

Pearl S. Buck, winner of the Pulitzer and Nobel prizes for her novels and her fine biographies, died quietly at the age of 80 in her Danby, Vt., home.

Miss Buck, the daughter of Presbyterian missionaries, lived the first 17 years of her life in China and learned to speak Chinese before she learned English. This background, as well as her perceptive insights into human nature, produced a number of fine novels about the Chinese people.

In 1932, "The Good Earth," probably her best-known work, won the Pulitzer Prize. The

Nobel Prize for Literature awarded to her six years later made special mention of 1936 biographies, "The Earth and 'Fighting Angel'."

Miss Buck was the American woman to win the Nobel Prize for literature. Besides being an outstanding writer, Miss Buck was a lady. Always concerned for unwanted or unloved, Miss Buck adopted nine children, making them interracial. She raised them together with her one natural child in an atmosphere of love and acceptance.

Pearl Buck contributed more than her talent to the world, also gave her mind and her heart

associate with the issues that concern the candidates with running for office.

Doug B.
Rooster, Minn.

BOTH SIDES NEEDED

I was happy to see you representing "the other side" campus last week presenting views, intelligently discussing ideas with dissenters and giving literature to those interested.

This is the first time in my years at Brigham Young that both of controversial subjects have been heard. I hope this "free experience" act as a catalyst for similar events in the future. Even though some of us may agree with what has been presented, it is imperative that a university give its students with a large range of facts so that they may decide for themselves. I hope to be able to rely on it to support and justify their decision. Hopefully, example will be carried over to classroom where relevant controversial subjects can be discussing the BYU education as professors to be.

Douglas T.
Pittsford

Letters

SUPER-CONSUMER

The problem of feeding the world is as old as civilization itself. For most Americans, there is no problem. When we go to sleep at night our bellies are full, and our thoughts far removed from the origin of our next meal.

Despite this seeming food abundance, many people in the world are hungry. We need to face the demand for food in deprived regions now. There are 270,000 infants born into this world each day, and 142,000 people die each day. Of these, 10,000 die of starvation and malnutrition.

This leaves a 120 surplus or population increase to be fed.

These facts point to very clearly the great need for a continued increase in food production. The standard argument for bringing about this increase are: (1) find new lands (2) enhance productivity (3) prevent loss to insects etc (4) technological innovation. These are all admirable causes that are being followed by modern civilization, but agriculture still needs much help.

This help can come from the American public becoming educated

about the farmers' problems and then seeking to help him overcome them.

Please Mr. American super-consumer, don't put your best lands into housing and let the agricultural family have its left. Please don't complain so bitterly when the wind brings you an odor from a dairy operator three miles away.

Please be a little sympathetic with the farmer when food prices rise. His costs have probably risen more than the prices in the store, and besides that, he may not see much of that price increase anyway. It has a way of ending up in the hands of the middlemen. Please be aware of a code before reacting to an effort.

These are the conditions of the life-blood of this nation and the hope of many other hungry nations. The general public needs to become more knowledgeable about agriculture and the farmers' problems. Agriculture will not just take care of itself as many uninformed people think. It needs the sympathetic support and protection of the people.

Rex Lee

Children as tax deficits for curbing growth?

Note: Dean Rex E. Lee, associate professor of law, is the co-director of BYU's Law School in 1972. Dean Lee has B.A. from BYU in 1960 and his doctor of law from the University of Chicago in 1963. He is currently teaching at BYU. He is also the author of the legal implications of the recent Supreme Court decision on abortion.

Would it be Constitutionally possible to revise the laws to make children deficits instead of assets, as in the case of curbing population growth?

It would pose a question as to the Federal Government's power to enact such legislation. I think that the states could, as they have the power to enact laws in the interest of general welfare. The Federal Government does not have general welfare powers.

Is there the chance of legislation being enacted to require payments from state or federal sources to the parents of illegitimate children?

There have been cases come out of Louisiana in the last years involving just such a problem. They dealt with disparity of treatment between legitimate and illegitimate children as far as getting certain benefits from a deceased parent. In two of the three cases, the payments on the basis of illegitimacy were unconstitutional, because it discriminated in favor of one class of children over another.

Is there a nationwide birth-control program, could the Federal Government coerce federally-financed schools to set up programs for teaching students to not have children?

There are kinds of things get done without too much consideration as to whether the Federal Government should do so, or has the power to do so. They might.

Have laws been passed stating that people living in certain areas, such as slums, would have to get a certain amount of education before they could have children?

It is a possibility. If it is, it raises Constitutional questions about the Fourteenth Amendment's guarantee against deprivation of property or property without due process of law. The Ninth Amendment, which states that the people might have certain rights not mentioned in the Constitution, might also be cited in such a situation.

The U.S. Postal Code prohibits the mailing of anything advertising abortion. In light of the recent Supreme Court abortion decision, do you think this section of the Code may be changed?

The defense of the present system is that you don't want people having abortions on a do-it-yourself-at-home basis. I'm talking now about things which might lure the public to a particular abortionist. But to have such a rule so that it prohibited the American Medical Association to send out information about abortion, would be clearly unconstitutional.

The Ninth Amendment to the Constitution says the people may have rights not stated in the Constitution. Suppose some legislators

Dean Rex Lee

interpreted that to mean the people have the right to an "uncrowded environment." Could the Ninth Amendment then be used to justify population control measures?

The "invisible rights" of the Ninth Amendment that have been proposed by some justices should not constitute a source of legislative power. The principal function of Constitutional rights is to strike down legislation which infringes on Constitutional rights. The Fourteenth Amendment, unlike the Ninth, declares Constitutional rights and expressly says that Congress shall have the power to implement those rights by appropriate legislation. The Ninth Amendment has no such provision.

What are your own feelings on the need for population control?

Estimates that the United States would be overpopulated by the end of this century have been with us for the better part of the decade. The estimates today are not so bad as we thought they would be when we started getting worried several years ago.

Did the Supreme Court's decision on abortion stem from the liberalized abortion laws in England and the Scandinavian countries? What are its consequences likely to be?

I think it came about because it got seven votes on the Supreme Court. I think its consequences are obvious: abortions are going to be a lot easier to get, and that's something that is abhorrent to me. I suspect you will have some kind of fight stemming out of the Court's decision, either attempts to redo legislation or perhaps attempts at a Constitutional amendment.

Cony of Journal to lecture today

Ed Cony, executive editor of the Dow Jones publications, the Wall Street Journal and the National Observer, arrived on campus Thursday to be an editor-in-residence with the Communications Dept. During the day, he spoke at several communications classes.

He will speak in a lecture which is open to the public today at 2 p.m. in 278 JKB.

As part of the editor-in-residence program, Cony is visiting

Says Keith Meservy**College senior seminars relate to religion**

By CAROLYN GOATES

Universe Staff Writer

How does humanities relate to religion? Can the patterns in literature be similar to those in scripture?

One-hour senior seminars in religion attempt to relate school subjects to religious principles, according to Keith Meservy, seminar instructor.

So far, the colleges of religion, business and humanities, each have a seminar focusing on the religious correlation of their subject and the gospel.

The religion seminars focus on different aspects of religion, said Meservy. "Little known facts about well-known people and events in Church history," is the topic of a seminar taught by Ivan J. Barrett. Church history and presidents of the church are studies under Leon Hartsborn. The third seminar discusses the contributions of various Christian leaders.

THE HUMANITIES seminar

covers patterns of literature, applications to religion, and has even compared Greek tragedy to the LDS concept of justice and mercy, according to Brian S. Best, humanities seminar instructor.

The business seminar which relates various concepts in business is taught by Stephen R. Covey.

Both instructors and students felt that more time was necessary for the class. "The instructor is forced to make his field of study much narrower," stated Brother Meservy. He explained that the seminars meet only one hour per week.

"I feel that two hours a week would cover the subjects better," said Laura Smith, a senior in English from Klamath Falls, Ore. All students interviewed felt that the seminars should be continued for future semesters.

"This is the best class I've had at BYU," said Ted Lewis, a junior in French from Gallup, NM. Lewis explained that the seminar added

meaning to religion in relation to his major field and career choice.

Best commented that his only dislike of the seminars was that he was forced to miss departmental meetings and lectures scheduled at 10 Thursday, when the seminars are usually held.

Mormon drama portrays Moses

DAVID BELLESA
Univ. Staff Writer

"Tables," the epic drama of Moses, came to life in the premiere in conjunction with the annual Mormon drama, a play which combines the Robert Stoddard with music and lyrics of Oson. It must be viewed as a successful production of the growth of his brother Aaron into a prophet and priest. In actuality must be a spiritual experience, a revelation that involves the playwright to see.

The experience which is intense and involved, the sense of the stage and the audience causes deep in as the story of the of Israel and Moses tell of their education and dependence on the Lord for eventual freedom.

The modern production of "mod" music ringing to hard rock which is used to make a about a preceding scene which is to come. The coupled with strong, good singing by both chorus, must be noted as the play's highlights. The music of Stoddard and the word holds the audience's full throughout much.

The intense heat in the Pardee theatre and length of the definitely distracted otherwise superb by a cast of over 40.

creative

piece set

ent as a creative art will during the Mormon Arts in a special dance piece designed for the play.

ful of Dance for the will be presented by thesis featuring children and BYU Creative Dance performances will begin in 185 RB March 21-24. Rehearsals for the benefit of grants will be presented and 24 beginning at 2 will be no admission and reservations for seats made at the Women's event.

choreographed to and inform range from lighthearted movement to colorful costumes as well as lighting effects.

gram will include a new in motion by Edd member of the Ririe Dance Company and a student. The lively, dance demands a great technique, agility and from the performers.

ography by Cathy Herbert, a member of the BYU faculty, will also be. The worshipful dance and praise has been music from Bernstein's

los from the large "A Full House" by Dee Winterton. In last year's Festival of Arts will also be.

Not even excellent performances given by Mark Hopkin as Moses, Roger McDonald as Aaron or David Duntan as Jethro could right the discomfort caused by the theatre's temperature.

The Daughters' of Jethro, played by Cynthia Oaks, Gail Stallings, Anna Twelves, Carolyn Lee, Toni Jackson, Tina Fletcher and Mary Joe Cunningham added their feminine charms to further enhance and strengthen the play's story that covers over 100 years.

"Stone Tables," directed by Dr. Charles W. Whitman, utilizes beautifully choreographed scenes and film to show the parallels between what Moses learned from God and attempted to teach the children of Israel and what the present-day prophets are telling us.

Perhaps an awareness of Mormon theology of the life and teachings of Moses makes "Stone Tables" a much more meaningful play.

A definite show stopper is Moses meeting God, "Face to

face," on Horeb. God is dressed in a white flowing robe covered with one inch square mirrors. The effect is dazzling and to mortals is perhaps a glimpse into eternity.

"Stone Tables" must be considered the major Mormon production of the year.

Looking back

Time, apathy take toll in 40th Utah Legislature

By CHARLENE RENBERG
Universe Staff Writer

Some momentous programs saw their way to fruition during the 40th session of the Utah State Legislature while many others were lost either through apathy, disapproval or the time clock.

While State senators and representatives voiced approval for some bills passed, there was an undercurrent of criticism that much more could have been accomplished.

Veteran State Senator Ernest Dean, D-American Fork, Senate minority leader, called the Legislature "the slowest-moving session I have ever seen." He claimed that so much time was spent on budget and appropriation matters that a "multiple of good bills never got to be debated in both houses."

In fact, said Dean, only about one-third of the bills presented were even acted upon.

Among measures which died because of the scythe of time were bills to provide free text books for education and a bill to provide for sidewalks along highways where children must walk. A state building code measure never managed to move during the session, nor did another measure to buy land for a state recreation area.

The House operated for the first time under refined and streamlined procedures. As a result, nearly all of the 365 measures introduced in the House and scores of Senate bills and resolutions received passing acknowledgment at least.

HOWEVER, the Senate operated in a calm, often tedious manner because of traditional procedures. Members of the House often criticized the smaller body and some claimed that all of the House's hard work resulted in nothing because of the Senate.

The Senate hastened its pace, and in the moments before the legislature ended, Senate President Warren E. Pugh, a Republican from Salt Lake, literally ran through the halls to speed passage of the appropriation bill.

Dean claimed that appropriations committee smaller and allowing only experienced persons to be on it.

Republican Senator Karl N. Snow from Provo said that the entire legislative system needs to be re-examined. According to Snow, "You can't do everything that needs to be done in 42 working days every other year."

Dean agreed that the present length of the session is simply

not enough time to handle Utah's affairs.

A note of praise was sounded from David C. Harvey, D-Pleasant Grove, who maintained "We're a citizen legislature, and I think we do a better job than a professional legislature."

Two of the first bills to create headlines were the Equal Rights Amendment and the Newsmen's Shield Law, the first of which was killed and the second which was slipped into limbo after heated debate.

UTAH HAS promised equal rights for both sexes through a 75-year-old state constitution guarantee, but consideration to extend this right with a national amendment met with bitter opposition.

Most delegates freely agreed

that they reacted to the bill on the basis of their mail, which ran 10-1 against the amendment.

The newsmen's shield bill met death when it moved to the Senate after four hot committee hearings in the House. It never got out of the Senate committee.

Representative Willard Hale Gardner, R-Provo, expressed regret to see the shield law bogged down and he was also disappointed that the no-fare transit bill was not passed.

In addition to the land use and textbook proposals previously mentioned, several bills originated by Gov. Calvin Rampton fell by the committee wayside, including a measure to regulate strip mining, one for landlord and tenant relations and a bill to provide

survivor's benefits to families of slain policemen.

THE HERALDED land use bill was written seven times before House Speaker Howard C. Nielson, R-Provo, commented "Don't call us, we'll call you."

The land use bill was killed with

a victory going to hard-lot developers.

Despite the many problems there were a few measures introduced. Bills of County interest included appropriation of 9.5 million dollars to the Utah Tech College at Provo.

ing at ASBYU elections

Coeds vie for Belle crown

Belle of the Y will be crowned tonight when her coronation ceremony is held on the mountain. The coronation ceremony will light up at 9:45 p.m., with the coronation lasting twenty minutes.

Contestants have gone through a variety of experiences to test their abilities in fields such as singing, talent and culture. The coronation will continue through the coronation as part of ASBYU elections. The coronation is sponsored by the 79th BYU chapter, Eileen Twitchell is a majoring in interior design.

GREEN HAS BEEN active in the coronation, "Footprints," and worked on Red Cross Blood Drive Committees. She is currently a part-time secretary at Program Bureau.

Her interests include sewing, singing, handicrafts, skiing,

golfing, bowling, tennis, art, music, dance, speech and drama.

JILL SHARP is a sophomore majoring in nursing.

She lists playing the piano, singing, ballroom dancing, reading, embroidery, skiing, and bike riding as some of her favorite things. Jill also enjoys smiling, being happy and making others happy.

From Pocatello, Idaho, Jill was Key Club Sweetheart in high school and secretary of her senior class. She was also Duchess of Intercollegiate Knights at BYU in 1971-72.

SOME OF MARY ANN MILLER's pastimes include dancing, cooking, sports, playing the piano and "just being a friend."

Mary Ann, a sophomore, claims Provo as her home and has interior design as her major.

This summer she plans to

participate in the International Folkdancers' European Tour.

"Meanings are not with words, they are within people," sums up graduate student Madge Lindsay's personal philosophy of life.

MADGE IS studying speech communication and plans to teach speech on the college level.

She enjoys working, being with other people and skiing. She is from Ogden.

SUE HILL likes walking in the rain, planning activities, working on a lesson, talking with friends, doing genealogy, exploring ideas, baking cookies and caring about people.

Sue has served as president of R Hall in Deere Towers and in ward MIAs and Relief Societies. She has also planned the 1970 Laurelife Conference and has written the Laurelife song.

Deposits prove costly

When wrong box used

The problem of people dropping mail into the wrong deposits has reached major proportions at BYU, according to director of Mail Services.

Harold S. Hintze, director, said Thursday the problem is costing the University money and time.

Included in each campus building is a post office with three separate mail drops: building mail, campus mail, and U.S. mail, he explained. A separate drop is also provided for parcels.

"Our difficulty," stressed Hintze, "is that too many people are depositing mail with no regard for the type of service required, and from inside the post office there is little difference in the contents of each mail drop box."

ACCORDING TO Hintze, the

Off-season 'Santa'

finds cops not so jolly

DUBLIN, Calif. (AP) — When a 220-pound man tried to slip down the chimney of a pizza parlor Santa Claus style, it took three firemen to pry him loose and haul him to the roof.

Daniel Fred River, 28, of Oakland, Calif., was wedged in the chimney about five hours before a janitor heard his muffled cries and notified the fire department.

Rivers told police he did it for a joke, but the unsuccessful chimney climber was booked for investigation of burglary and released on \$3,000 bail.

result is a tedious sorting and unnecessary handling.

"Frequently the amount of mail deposited is too large for any of the three letter drops and is pushed by hand into the parcel drop."

"There is evidence of an 'I don't care' attitude and of carelessness and indifference which ranges from absent mindedness to inattention," said Hintze.

According to Hintze, the Building mail drop is intended to keep mail deposited in each building for destination in that building from entering the flow of mail to the Campus Post Office only to return on the next delivery to the place from which it was mailed.

"If properly deposited, it will be sorted to the mail boxes in the building without extra handling and delay," said Hintze.

The campus mail drop is intended for BYU mail which is to be delivered to other BYU buildings, and the U.S. mail drop is for letters requiring postage or with stamps already affixed, Hintze added.

"This is not a problem that has always existed, and we need your help so that we can help you," related Hintze. "If the public would deposit mail in the correct drops, as well as deposit as much mail as possible earlier in the day, the costs of time and lost motion would be greatly cut," he said.

Payers pay

Solons prove expensive

WASHINGTON (AP) — It costs an average of \$188,000 to keep a representative in session and pay for his office expenses, according to a study released last week by the Congressional Budget Office.

Basic costs include the annual salary of each of 438 senators and 438 representatives and delegates, plus travel expenses.

House members are allowed \$165,000 per year to pay for 16 employees in his district and district offices.

Senator's clerical allowance according to the size of his district from \$327,000 to \$400 per year, with no ceiling on the number of employees but a salary of his No. 1 aide. Currently the top is \$100 for the Senate and about \$50 for the House.

All members use their total

allowance. The unused balance reverts to the Treasury.

Neither do all members use all of the allowances for fringe benefits, which are not included in the average cost of keeping up a congressional office.

Basic costs in the legislative appropriation bill enacted last year included \$62 million for salaries of House members' office staffs and \$20.4 million for the salaries and travel allowances of members. The appropriation for senators' office staffs was \$34.2 million and \$4.7 million for senators' salaries and mileage.

FRINGE BENEFITS which add to the over-all cost of running Congress include:

—Franked, or free, mail for official correspondence. The estimated cost for fiscal year 1973 was \$21.2 million for both branches.

—Stationery allowances of \$4,250 per year per member for the purchase of office supplies at reduced rates. Not all members use this allowance. Some draw it in cash.

—Telephone and telegraph allowances amounting to the equivalent of 40,000 minutes of long-distance talking or 160,000 words of telegrams for every two years, plus unlimited long-distance calls in evening hours and all day on weekends, on leased government lines for representatives. The long-distance allowance is the same for all members, whether they live in Virginia or California.

—Travel allowances of 18 round trips home per session for House

members and 45 for senators. This is in addition to foreign travel available to most members for official business, and for trips to home states or districts for staffers.

—Members are allowed free office space in federal buildings in their home states or districts, or limited rental allowances and office expenses if free space is not available. Monthly district-office rental for House members may go as high as \$350 in some cases.

Life insurance, health insurance and retirement annuities are available for any member desiring them and paying part of the cost, up to eight per cent of monthly pay for the retirement program.

BONN, Germany—The dollar tumbled again Thursday while Treasury Secretary George P. Shultz conferred here with Chancellor Willy Brandt and his top monetary experts on ways to end the monetary crisis.

Number 51?

PANAMA—Brig. Gen. Omar Torrijos, saying Panama does not want to become another star in the U.S. flag, called for world support Thursday in helping this republic assume control of the Canal Zone. He made the appeal at the opening session of the special Latin American meeting here of the U.S. Security Council.

Prof okay after heart surgery

BYU professor Percy Burrup is listed in satisfactory condition at the Salt Lake LDS Hospital after open heart surgery was performed Thursday morning.

Burrup experienced chest pains during the BYU-New Mexico

basketball game last Feb. 17 and was taken to the Utah Valley Hospital for emergency treatment. Twelve days later he was admitted to the University of Utah Medical Center because of a blood circulation blockage near his heart.

A FRIENDLY FACE FAR FROM HOME.

Away from home. For the first time or the fiftieth time. You can always use a friend.

If you're from one of 94 cities in the Inter-mountain Area, chances are First Security is your hometown bank.

When you come to school in a strange town, as far as we're concerned, we're still your hometown bank. Just as friendly, just as anxious and willing to help you as the bank you grew up with. We call it person-to-person banking. But it means we just want to be friends.

Come in and see us.

You have a long way to go.
We want to help along the way.

HELP US CELEBRATE ALLEN'S GRAND OPENING MARCH 16 and 17

(We'll be open this Friday and every Friday 'til 9 p.m.)

Our new store at 36 North University (1 door north of our old location) is finally completed and we'll be able to offer you the finest in sound, greeting cards and gifts, and photography equipment in pleasant uncrowded surroundings. Just park in the rear.

Allen's is more than a camera store. Now, you'll be able to buy the finest in component stereo sound (as well as portable recorders and radios), greeting cards and photography equipment. Here's a sample of some of the brand names we carry.

SONY CANON NIKON PANASONIC
KODAK BELL AND HOWELL DEJUR
NIKKO AGFA DUAL FUJI BUSHNELL

AMERICAN
GREETINGS

LENTAR GARRARD KINDERMAN SHURE
PRO GAF SAWYERS HITACHI TOSHIBA
KALIMAR INTERAUDIO CAPRO SOLIGOR

FREE CAMERA CLINIC

Bruce Longstroth, the finest camera repairman in Utah Valley, will be available to check your cameras. He'll check and measure every major camera function WHILE YOU WAIT and FREE OF CHARGE. He'll check shutter speeds, synchronization, light meters, winding mechanisms, focusing—in short, almost everything. He has the finest equipment, so you can be sure of the results.

If your camera does have a problem, he can give you an on-the-spot estimate of the cost to fix it and advise you of possible alternatives. If the problem is a minor one, he'll repair it at no charge to you.

COME IN AND GET YOUR CAMERA CHECKED FREE OF CHARGE

PENTAX SPOTMATIC II

Now you can get one of the finest cameras at the finest price. This Spotmatic II has a lens (Super-Multicoated for sharpness) and a rough-the-lens meter for accurate results all the time.

Lars Christensen, left, as Joseph Smith and Ken Salzman as Hyrum Smith in "Prophet."

Joseph Smith drama set for Arena Theatre

"Prophet," the new musical drama about Joseph Smith, will open in the Arena Theater for its two weeks run on March 23 according to Norton Jacobs, student director of the production. Tickets go on sale today.

The original musical, written by BYU senior Thom Dunham, has gone through several rewrites to make it historically sound and dramatically progressive. "As far as we know this is the only musical drama ever written about the Prophet Joseph Smith," the author noted. It tells the story of the final days in the life of the Prophet before the martyrdom in Carthage Jail.

Joseph Smith, as portrayed by Lars Christensen, is a sensitive but strong man who faced great trials

and learned and grew from his experiences. Christensen is a 1969 graduate of BYU and is now working on his master's degree in drama.

Some of the lighter moments in "Prophet" depict a wrestling scene between Joseph and his brother Hyrum, and the Prophet's proposal to his wife Emma.

Chris Speirs plays the role of Emma Smith. She is a sophomore in drama and is new to BYU this semester.

According to Miss Speirs, "It's exciting for the cast to know that the characters in the script actually lived and it has been a great challenge to recreate the relationships they had and to show their connection with Church history."

The set design for this production is in the round and different from that of any other show produced for the Arena Theater.

Noted singer gives recital

NEWS BUREAU — The BYU Faculty Artist Bureau will present Flora Nielsen, mezzo-soprano, in a recital March 23 at 8 p.m. in the East Mill Creek Fifth Ward Chapel, 3640 East 3510 South, Salt Lake City.

The public is invited free of charge.

Her program will include songs by Bononcini, Secchi, Marcello, Brahms, Debussy, Barber, Scott and Coleridge-Taylor. Accompanist will be Bonnie Winterton, who also serves as accompanist for the Utah Chorale.

A member of the BYU applied vocal staff, Mrs. Nielsen is a former student of Richard Bonelli, famed Metropolitan Opera baritone, and Mme. Nina Koshetz, famous Russian concert singer and protégé of Rachmaninoff. She is a member of the National Association of Teachers of Singing.

Mrs. Nielsen was winner of the "Most Outstanding Young Artist Award" in Los Angeles, was a recipient of a \$2500 study grant from the Saunders Foundation and a scholarship student at the Music Academy of the West in Santa Barbara, where she was soloist in the "Cantata of Two Cities," conducted by the composer Darius Milhaud.

The artist has appeared with the Walter Doudou Opera Theatre in Los Angeles, was a soloist with the Southern California Mormon Choir, and recently sang the alto role in "The Messiah" in Modesto, Calif. She also has performed in several roles with the Utah Opera Theatre.

Four presentations slated

Vignettes to begin Wednesday

The Mormon Vignettes will be presented with the theme "He That Endureth," March 21 and 22 at 8:30 p.m. and again March 23 and 24 at 5:10 p.m. in the Nelke Experimental Theatre of the Harris Fine Arts Center.

Directed by Dr. Preston R.

Gledhill of the Speech and Drama Department, the vignettes are historical events written up for dramatic interpretation and presentation. Featured on the program will be such stories as "For A Little While I Forgot," written by Jettie Jacob Anderson

of Clearfield, and interpreted by Kathie Troxler.

Ten short stories are outlined for the 1973 program.

Admission is free and seating is on a first-come-first-serve basis.

Heating stack passes pollution tests

By WADE JEWKES
Universe Staff Writer

Emissions from the stack of the BYU heating plant are well within the state and federal air pollution regulations, it was reported this week by Sam Brewster, director of the BYU Physical Plant, in response to inquiries about the condition of the heating unit.

In a formal statement Brewster said: "We are well aware of our responsibility to protect the environment of our community.

Each new boiler installed in the heating plant has included the best equipment available to reduce air pollution to a minimum."

William C. Stacey, supervising engineer of utilities, explained how the equipment works:

When the coal is burned in the boilers, the ash is carried away on a traveling steel grate and deposited in a hopper. This process eliminates about 80 per cent of the ash, reported Stacey.

He said the remaining 20 per cent travels upward and enters a multi tube centrifugal-type separator. "This device is guaranteed by the manufacturer to be in excess of 90 per cent efficient," he added.

The separator consists of tubes at the top of the boiler, explained Stacey. A fan pulls the air through the tubes and spins the dust down into another hopper.

"We have monitoring equipment on each boiler," said Stacey. A light emitter and a light receiver are located on each side of the stack. If the amount of smoke that passes through the light beam reaches a certain level, an alarm alerts the boiler operator, added Stacey.

He said that irregular coal was usually the cause when smoke sets off the alarm. All coal is approximately seven per cent ash, explained Stacey, and some coal contains more ash than other.

"Because of our concern in keeping air pollution at a

minimum," said Brewster, "in 1972 we invited the Utah State Air Pollution Board to give us their recommendations and suggestions. They determined that our stack emission was well within the state and federal air pollution regulations, and they were unable to recommend the use of any known devices or equipment to substantially improve our conditions without causing other serious problems.

"Nevertheless," continued Brewster, "in our effort to be good neighbors, we have sought the advice of experts in the field of air pollution. These experts have informed us that to further reduce our stack dust emission would be difficult and would require an exhaustive study to determine if there is equipment currently on the market which would improve our conditions more than the collection devices already installed."

In 1969, the air correction division of Universal Oil Products Co. made a study to determine what could be done to improve emissions from the stack. While this study was costly, no conclusion was reached whereby the situation could be bettered, said Stacey.

He added that Envirotec Corporation has also appraised the heating plant and concluded that 100 per cent efficient pollution controls are virtually impossible.

Anti-poison

Week planned

March 18-24 is National Poison
Prevention Week.

The purpose of the week is to
urge parents to use products
with safety packaging.

The theme, "Poison Prevention
More Than Packaging," was
in conjunction with the
poison prevention packaging
which require child-proof
caps for many products
used in childhood poisonings,
according to the Utah Safety
Council.

In addition, the Council
urges the use of special
warning, and warns parents to
read each package safety
label before use.

Aspirin is one of the products
with protective packaging and
in the peak year 1965,
sales have dropped 60 per cent.
Other out-numbers any other
poison swallowed by children
is acetaminophen, the Council reported.

A report by the Poison
Prevention Center, aspirin, soap,
vitamins and
candies are the top five
poisons most frequently
swallowed.

When are curious, they like
to smell, taste, touch and
taste things.

According to the Council,
parents should be aware of the
signs of poisoning not only in
the home, but also in the garden."

From hula hoops to goldfish, fads live on

POCATELLO, Idaho (AP) — Eaten a goldfish, lately? What about munching on a phonograph record?

These were only two fads that Americans — and college students in particular — indulged in during the 1930s and 1940s.

"Each age has its own follies, as its majority is made up of foolish young people," Emerson wrote.

In the 1920s Alvin "Shipwreck" Kelly started a fad known as flagpole sitting, a contemporary author on the subject writes.

For Kelly, his stunts atop flagpoles weren't simply larks. He made a handsome living by it and billed himself as "the luckiest fool alive."

In 1927, Shipwreck sat on a flagpole atop a 13 story building in St. Louis for 13 hours and 13 minutes. He later lengthened his record to 17 days and two hours in the same year.

Flagpole sitting was made less hazardous by a six-to-eight-inch disc that served as a platform, and stirrups that served as a safety precaution to keep the sitter from tumbling to the ground. In Kelly's case, he also carried his shaving equipment up with him and occasionally had a willing manicurist hoisted up to trim and polish his fingernails.

As with all fads, challengers appeared on the scene and the fad began to die, but not before a number of children were injured or fell to their deaths trying to imitate adult flagpole heroes.

Another fad of the same period was the dance marathons.

The marathons were endurance tests. Couples danced until they literally dropped in order to vie for prize money, sometimes with as much as \$6,000.

It was not unusual for the marathons to last anywhere from one to two weeks or longer.

Aside from dancing with each other, couples endured a great deal of abuse from each other and tempers flared openly, much to

the delight of spectators who paid to view the spectacles.

ONE REPORT notes that Olive Gos, during the 1926 marathon, couldn't stand the sight of her partner, Alois Bruhin, after spinning around the dance floor for several hours, and kept turning his face away.

Alois apparently resented this treatment and refused to cooperate, so Olive began to scream hysterically every time he looked at her.

It was not unusual for male contestants to ungentlemanly punch their girl partners in the jaw or drag them across the dance floor to keep their feet moving. Chivalry succumbed to greed.

In 1957, Americans fell in love with the hula hoop, adopting it from the Australians who used it in their gym classes. The Toy News Bureau reports \$45 million worth of hula hoops were sold in 1958 at the peak of the fad.

Although the hoop craze spread in many countries, Indonesia banned it altogether because they felt the use of it "might stimulate passion."

Some of the most publicized fads took place on college campuses, beginning with the goldfish-swallowing craze that began March 3, 1939.

A Harvard student, Lothrop Withington Jr., swallowed a four-inch goldfish to win a \$10 bet. Little did he know what he started. Soon, college students all

over the country were competing for the championship.

The peak of the fad came when Albert E. Hayes swallowed 42 goldfish in 52 minutes, but enthusiasm for the fad began to die when college presidents threatened drastic punishment for offenders.

In the 1950s, every respectable college fraternity was sneaking out at night to go on panty raids.

During spring evenings, sometimes as many as 2,000 male students would ascend upon the

girls' dormitories to collect their bounty, often receiving encouragement from coeds who waved their panties out of windows invitingly.

In 1967, a revival of sorts took place when a group of Yale men converged on the graduate women's dormitory chanting: "we want sex."

Other college-inspired crazes included piling students into phone booths and cars and

participating in marathon talkathons on the telephone.

In the 1960s, the Beatles arrived from England. Many older people considered them a passing fad, the young, too, but they soon became established performers.

Then came Batman and his hair for men. Batman departed the scene. But long hair remained today, generally accepted by men and even emulated by older generation men.

newborns

new discovery in detecting hearing losses

breakthrough in the diagnosis of middle-ear hearing problems in newborn babies may result from new studies by BYU and the University of Utah. These studies are being conducted at the Utah Valley Hospital Nursery by the Department of Pediatrics and the Clinical Audiology Area of the University of Utah, according to Dr. Ross M. Weaver, project director.

The study by Phil Allred, a graduate student in clinical otology, and his wife, Leana, will soon complete measurements on 50 babies born in age from four hours to six months. The study was assisted by Dr. Geary Haddess of the University of Utah. The project is supported by the research Division.

The ears of each baby are tested for abnormalities by the operating pediatricians, including Dr. Stewart W. Haddess, Dr. Thales Smith, Dr. J. Robbins, Dr. R.H. Haddess and Dr. A.V. Lindsay.

WEAVER said the acoustic reflex has found to be a very useful aid in the diagnosis of ear pathologies among older children and adults. If it is found present at birth, it could provide the basis for a hearing screening procedure for infants, Weaver explained.

among newborns have not received much attention, Dr. Weaver pointed out, because their ears are not examined routinely in the hospital nursery. There has been no audiometric technique available for detecting anything less than a severe hearing loss.

The undetected hearing losses may produce a later onset of speech disorders, learning disabilities and psychological problems.

The instruments used in Allred's study are a pure tone audiometer and a new Grason-Stadler Model 1720 Otoadmittance Meter. This meter contains a small probe tip connected to a sound source, sensitive microphone and air-pressure system, Dr. Weaver explained. The probe is sealed in the ear canal by a rubber cuff which enables varying air pressure to be maintained in the outer ear.

A tone thus may be introduced to the ear through the probe unit and is partially absorbed as energy needed to set the middle ear vibrating. Part of the tone is also transmitted to the brain and another part striking the eardrum, is reflected out of the ear, Dr. Weaver added. This reflected sound is monitored by the Otoadmittance meter through the probe unit and the difference between the tone intensity admitted to the ear and reflected off the ear is measured.

BY VARYING the air pressure and monitoring the change in reflection of sound off the

eardrum then, much can be determined about the hearing function of the middle ear, Dr. Weaver commented. For example, if the middle ear is filled with infectious fluid, the eardrum will become very stiff and reflect a higher percentage of sound out of the ear than would normally occur.

An additional indicator, the acoustic reflex, is a normal protective contraction of the muscles in the middle ear when stimulated by loud sounds. Any condition of the outer or middle ear which reduces the level of sound stimuli reaching the inner ear may prevent the occurrence of the acoustic reflex, Dr. Weaver explained.

Univision photo by Doug Martin

Steve Baxter on route to WAC Indoor long jump title.

Baxter carries on Cat leap tradition

By LYNN CANNON
Univision Staff Writer

Outstanding horizontal jumpers are a tradition at BYU. Former Cougar leaper Peritt Pousi holds the NCAA triple jump record (55-9/4) and BYU has had several long jumpers over the 25-0 mark in the past few years.

BYU sophomore Steve Baxter is doing his part to continue this tradition.

Baxter captured the WAC indoor long jump crown this winter with a personal best leap of 24-8. In the same meet Baxter barely fouled on a 25-6 jump. The next evening Baxter returned to place third with another personal record (50-6/8) in the triple jump.

The consistent improvement which Baxter has shown in both events this winter indicates greater things to come.

"I know that I can jump over 25-0 in the long jump," said Baxter. "But this (a 25-0 jump) has been sort of a mental barrier for me."

Baxter began serious jumping while in the 9th grade in his hometown of Anaheim, Calif.

"They took every kid in our P.E. class and ran them through every track event," said Baxter. "I jumped 17 feet in my first try at the long jump."

AS A SOPHOMORE at Leora High School, Baxter improved to 20-9 and then placed fourth in the Southern Section of the California Interscholastic Federation his junior year with a 23-2 leap. In his senior year Baxter improved his best mark to 23-11/4 and placed fourth in the California state meet with a 23-10/4 jump.

What is the basic difference between the triple and long jump?

"Actually the two events are quite similar. Any good long jumper can also be good in the triple jump," replied Baxter.

Baxter emphasized that technique is critical in both events but more could go wrong in the triple jump since three jumps are involved.

"I still have a lot to learn in the triple jump," said Baxter. "Sigurd

Langland (Baxter's Norwegian teammate) is a very good technician and he is helping me with my form."

What does Baxter go to train for his event?

"I jump very little in practice," said Baxter. "Nearly all of my training consists of running with the sprinters and lifting weights once or twice a week."

This spring Baxter will be shooting for a repeat of his WAC long jump win plus a jump of over 51-0 in the triple jump.

When asked who his stiffest long jump opponent would be in the WAC Baxter quickly named Arizona's Tony Brown.

Sporting week coming up for clubs

Everything from tricycle races for the ladies to an auto rally for the gents will be offered during Club Competition Week.

Competition between clubs in separate divisions for male and female clubs begins Monday and will run through Saturday.

The men will kick off the week with rugby on East Haws Field from 6-7 p.m. Monday and then step to the plate Tuesday evening from 5-7 p.m. for softball.

Water basketball is scheduled for 7-8 p.m. Wednesday in Pool C; RPE Basketball in the Women's Gym, golf on the Timp Course and tennis doubles on the indoor courts are slated for Thursday.

Tug-of-war and flag football will be on Friday. Saturday will round the week out for the men with a mud bowl and a car rally.

For the sporting women the tug-of-war will be noon Monday while bowling will roll at 4 p.m. Tuesday. Softball is set for Wednesday; relay races, horse shoes and basketball will be on Thursday. Football action is slated Friday and Saturday, there will be tricycle racing, egg tossing and volleyball.

Explaining the rules for the first annual Universe Three-man Basketball Tourney to the "Has Beens" Brian Ambrozich, Moni Sarkalahiti and Jay Bunker is Universe staffer Claire Andrews.

Two weeks away

Tourney filling up fast

Entries in the Daily Universe Three-man Basketball Tourney are filling up fast as the known, unknown, the tall and the field teams for the March 31 competition.

"Jayne and Gang" composed of Dave Bailey, Craig Jorgensen, Mike Atwood are the latest entries in the unlimited division. They should prove to be a formidable opponent for the "Has Beens" consisting of Brian Ambrozich, Moni Sarkalahiti and Jay Bunker who entered earlier in the week.

A myriad of varietal cagers representing six Utah schools are expected to compete in the elimination tourney which takes place in the Richards PE building from 10 a.m. - 7 p.m. Entry include John Benzon

(BYU), Ken Guber and Brady Small (Weber State), Bob Lauricki (Utah State), Jim Sorensen (Utah), Doug Tate and Willie Haws (Westminster), and Sam Little (Utah Tech).

For the students, faculty and staff of BYU exclusively, there's the limited division. This division is still wide open and those who qualify are encouraged to enter soon.

For the shorter set, there's a six-foot-and-under division (students and non-students allowed). There will be 16 teams in each division.

Entry fees of \$10 will be assessed, with proceeds going for trophies and the BYU Library Fund. Admission to the tournament will be 50 cents per person.

Rugger squads square off

Rugby at its best will be the diet for enthusiasts Saturday afternoon when both BYU Blue and White squads square off against opponents on Haws Field. The Blue squad will meet the Salt Lake Polytechnic at 2 p.m., and the White will face Utah State at 3:30.

Saturday's encounter with the Polytechnic will be the first outing of the home season for the Blues and Coach John Seggar is anxious to see them perform.

"When we initially divided the squad in half, I wasn't sure what the outcome would be. But after last week's showing by the White team, all I can see is more of the same."

Last week's success for the White squad amounted to a 39-3 thrashing of the University of Utah which saw the Cats try several new tactics to the Utes' dismay and BYU's advantage.

Leading the Blues in their opening encounter will be backs Norman Soukai, Kana Lui, Jim Nance, John Shane, Dale Johanson and Greg Kitchen. Rick Blaser, normally a front row forward, will round out the backline at center.

In forward play, the Polytechnic will be contending with Dave Hightson, Cal Johnson, Dennis Peterson, Rich Lund, Wayne Cannon, Hepa Solomon and either Jim Holmes or Don Gubler at the number eight spot.

The White squad will generally go with the same lineup they used to demolish the Utes last week, with a few exceptions. John Hubbard will fill in for the injured Simi Brown at prop. Brown suffered a knee injury in last week's match and will be out for the rest of the season.
